

INSULMATERIALS

Your Dedicated Insulation Supplier

HIGH-PERFORMANCE INSULATION BLANKETS

ENGINEERED FOR EXTREME CONDITIONS
BUILT FOR LASTING PERFORMANCE

Insulmaterials supplies high-quality insulation blankets for industrial and high-temperature applications. Our blankets reduce heat loss, improve energy efficiency, enhance safety, and extend equipment life.

OUR HIGH-TEMPERATURE BLANKET RANGE

CERA BLANKET

High-purity alumina-silica spun RCF blanket for furnace linings and back-up insulation, with a classification temperature of **1260°C**.

CERACHEM® BLANKET

Alumina-silica-zirconia RCF blanket for extremely high-temperature applications, with a classification temperature up to **1430°C**.

FIREMASTER® MARINE BLANKET

Passive fire protection insulation blanket for marine and offshore structures, offering a **20-30%** weight reduction compared to traditional fire protection systems.

SUPERWOOL® PLUS BLANKET

Versatile AES fibre blanket for industrial insulation systems, with a classification temperature of **1200°C**.

SUPERWOOL® PRIME BLANKET

High-temperature AES fibre blanket for advanced industrial insulation, with a classification temperature of **1300°C**.

KEY BENEFITS

Excellent thermal insulation

Energy savings

Reduced CO₂ emissions

Personnel protection

Easy installation & removal

Reusable & custom-made

High temperature resistance

Durable industrial quality

APPLICATIONS

- Petrochemical Industry
- Power Generation
- Marine & Offshore
- Steel & Foundry
- Glass Industry
- Heat Treatment
- OEM Equipment
- Industrial Furnaces

INDUSTRIES WE SERVE

Oil & Gas

Petrochemical

Power Generation

Marine & Offshore

Food Processing

Chemical Industry

OEM Manufacturers

Industrial Maintenance

LOOKING FOR AN INSULATION BLANKET SOLUTION?

Our specialists are ready to help you select the right thermal insulation solution for your application.
